Padauk issue #27 – Mon Thai (subjoined) variants

https://github.com/silnrsi/font-padauk/issues/27

Issue: Need new subjoined glyphs to complement the normal Mon Thai variants.

For example, ᩈ᩠ᩈ is how u1003 is shown along with a subjoined u1003**.med** below.

Glyphs needed: Medium sized glyphs (similar size as the .med glyphs) for the following Mon Thai glyphs: *u1003.thai, u100B.thai, u100C.thai, u100D.thai, u100E.thai, u1012.thai, u1014.thai, u101E.thai and u1020.thai*. They are needed for each of the faces.

Encoding: *All are unencoded*.

Attachment points: Should be similar to their corresponding regular .med glyphs.

(Glyphs shown are a large representation.)

Name: u1003.thai.med	Glyph: ᩠ᩈ	
Name: u100B.thai.med	Glyph: ᩠ᩋ	
Name: u100C.thai.med	Glyph: ᩠ᩃ	*Note: glyph should lay rotated (same as u100C.med)*
Name: u100D.thai.med	Glyph: ᩠ᩊ	*Note: tail should be shortened (same as u100D.med)*
Name: u100E.thai.med	Glyph: ᩠ᩍ	
Name: u1012.thai.med	Glyph: ᩠ᩑ	
Name: u1014.thai.med	Glyph: ᩠ᩆ	*Note: tail should be shortened (same as u1014.med)*
Name: u101E.thai.med	Glyph: ᩠ᩏ	
Name: u1020.thai.med	Glyph: ᩠ᩐ
